DETAILED ACTION

Response to Request for Continued Examination

The examiner is in receipt of applicant's response to office action mailed 3/16/2005, which was received 9/16/2005. Acknowledgement is made to the amendment to claims 1,9,10, the addition of drawings FIGs 1 and 2, and the submittal of a marked up copy of the original specification. The examiner has carefully considered the amendment and finds the clarification to the specification and drawings to be acceptable and not containing new matter. As for the rejection on the merits the applicant's arguments and amendments were convincing, however after further searching a new grounds of rejection follows:

Examiner's Note

Examiner has cited particular columns and line numbers or figures in the references as applied to the claims below for the convenience of the applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant, in preparing the responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 3-5,7-13 and 15-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Perkowski (2005/0251458).

In regards to claim 3, Perkowski discloses a method for searching a computer network for a product associated with a brand name (FIG 4A1), the method comprising the steps of

inputting a query message into an online device accessing a portal to a predetermined website, wherein the query message approximates the brand name associated with the product (FIG 4A1, Zantac approximates Zantac 75);

searching only a plurality of brand names for a first match of the query message with a matching brand name (page 4, para 0041); and

outputting a first uniform resource locator (URL) address associated with the matching brand name and providing information about the product (page 4, para 0041).

In regards to claim 4, Perkowski teaches wherein the brand name is selected from the group consisting of a company name of a desired company and a product line name of a specific product line (page 4, para 0041).

In regards to claim 5, Perkowski teaches wherein the online device is computer (FIG 2).

In regards to claim 7, Perkowski teaches accessing an Internet-based website using the first URL address associated with the matching brand name (page 4, para 0041).

In regards to claim 8, Perkowski teaches wherein the Internet-based website is distinct from the predetermined website associated with the portal (FIG 2 and 2A).

In regards to claim 9, Perkowski teaches wherein the step of accessing an Internet-based website using the first URL address includes the step of accessing an information webpage associated with the matching brand name (FIG 4A1).

In regards to claim 10, Perkowski teaches wherein the information webpage displays information associated with the matching brand name, with the information

Art Unit: 3625

being selected from the group consisting of special promotions, store locations, store hours, phone numbers, and current sales (FIG 4A2).

In regards to claims 11-13 and 15-17, these are considered to be parallel claims to those above and are rejected for the same rationale.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6,14 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Perkowski in view of Official Notice.

In regards to claims 6,14 and 18, Perkowski teaches the use of an interactive screen (FIG 3A2), but does not specifically mention that the online device is a television. The examiner takes official notice that the use of interactive televisions to provide services such as those taught by Perkowski were old and well known in the art. It would have been obvious to a person having ordinary skill in the art to include in Perkowski the use of an interactive television, because this would include another means for providing access to the information, thus increasing revenue from people who use interactive televisions for online shopping and information gathering.

Response to Arguments

Applicant's arguments with respect to claims 3-18 have been considered but are moot in view of the new ground(s) of rejection.
